Subject: FW: FW: Leavenworth Hatchery New Source Question (NEPA trigger)

Jamey, I can't remember if I shared this food per month response with you yet or not. I believe I forwarded the fish production information. I'm checking back through emails because I haven't heard anything more about the construction/upgrades since 2004 – so I'll check in with Malenna again on that. Thanks!

**Maximum amount of food (lbs.) used in one month at LNFH
(including YN coho program)**

2010 = 10,032
2011 = 13,528
2012 = 10,142
2013 = 10,314
2014 = 11,176
2015 = 9,643

Hi Steve and Malenna,

I'm sure to whom to direct Jamey's email, so I'm sending to both of you just in case. We had talked a little about the annual fish production (in pounds) when we met in person a few weeks ago. Please write back, or call me, with the answers to the questions below. If you have fish production data back to 2004, it would be helpful. The first step in determining whether EPA needs to public notice a NEPA document along with our Draft NPDES Permit is knowing whether and when the threshold is met.

Thanks so much for your help with this. Hope you have a good week!

Subject: Leavenworth Hatchery New Source Question

Hi Jill-

The new source date (for the NPDES Concentrated Aquatic Animal Production Facility Effluent Limitation Guidelines) is 09/07/2004.

The main questions we need answered are:

- 1) Annual production at Leavenworth, and the details of their “share” program with the Tribe.
- 2) A description of any and all construction/upgrades/renovations etc at the facility since 09/07/2004.

Let me know if you want to chat further or have any questions. Thanks.
